

Brian Hopwood HOMES

Brian Hopwood HOMES

Brian Hopwood Homes have nearly thirty years of building experience on the Coffs Coast. The last twelve months have been massive for them and they have seen some really beneficial changes occur. **What hasn't changed is their passion for their clients and ensuring they continue to work close with them throughout the build process from enquiry to completion.** The team have always prided themselves on the relationships they form whether they are first home buyers, downsizers or investors. FOCUS had a chat with Brian to find out more....

A bit about Brian by Brian
I moved to Coffs Harbour in 1988 for Orange, with my then wife Sandra and my three children, Peter, Renee and David. I played Rugby League with the Coffs Comets (not very well) touch football as well as indoor cricket (slightly better) and quickly made a lot of friends. Within a short amount of time I began to love the Coffs area. In 2004 I was diagnosed with stomach cancer. The doctors removed my entire stomach and said I might only live for another 9 months... 14 years later I think I am going pretty well, I am healthy, happy and still love living here on the Coffs Coast. I still play OzTag (again not fantastically) and take my now wife Kim Connolly of 10 years down for a walk and a swim at Sawtell Beach every weekday

morning. I thoroughly enjoy my work and the friends I have made from co workers, contractors and clients are a blessing. Life moves on and the Coffs Coast keeps shining. Kim and I are expecting our 11th Grandchild and we so love everyone single of them. They are a revitalization of your life and excite us every time we spend time with them. I have enjoyed having my son David join our amazing team, he brings a youthful enthusiasm to the business and is a breath of fresh air, we believe the next 30 years will be as exciting and as fulfilling as the last 30, and who knows maybe then we will have hover houses... I am very much looking forward to building many more homes for many more years to come. **What services do Brian Hopwood Homes**

focus feature.

“

creating your lifestyle... together

Elements Estate

The 'Elements Estate' is the company's newest most exciting project. We currently have **16 Lots** in both Stages 1C & 9 of the Estate, with 3 of the 16 already sold. The Estate is in a prime location just off Stadium Drive, Coffs Harbour. The location is perfect as any buyer lucky enough to secure a house and land package within the residence will be within minutes of the airport, university, reputable schools, the Sporting Stadium, Coffs Harbour Health Campus as well as shopping centres not to mention the 5 beautiful local beaches. Each block captures elevated mountain and ocean views with cool sea breezes on a summer's day and warm westerly sun on a winter's morning. With such stunning aspects, Brian is very excited to build and design homes that feature and showcase these million dollar views. Brian has 8 current designs for the available blocks so prospective buyers won't be limited by choice and changes can be made to the current plans or we can build your own plans. **4 bedrooms, 3 living areas,** ensuite and WIR plus double garage, these homes will be completed and ready to move into, and will have quality inclusions throughout-stone bench tops, floor coverings throughout-including carpet and tiles, driveway, landscaping, fencing and even the letter box. Priced from **\$537,160 to \$564,116** these are incredible value for home owners and investors alike.

PRICED FROM **\$537,160 to \$564,116**

“This Estate is absolutely perfect for everyone; families, first time home buyers, relocations, investors and retirees, with so many amenities at your fingertips what more could you ask for?”

BRIAN HOPWOOD

meet the team.

The team here at Brian Hopwood Homes is a close knit, dynamic and hard working group of people. **Everyone has their own unique set of skills which when combined makes for a productive and efficient unit.** From go to whoa the team is there for you, no question is too big or too small & no job is impossible.

BRIAN HOPWOOD.
DIRECTOR
At the head of the table is Brian Hopwood himself, he has been building dream homes for more than 35 years and over 1000 families in the Mid North Coast Region. Brian's extensive knowledge of architecture and carpentry, when combined with a client's desires & needs produce precise and wonderful designs, from our standard plans to sleek modern homes to grand double story mansions. Brian's attention to detail and big picture vision for each individual build ensures that the client gets exactly what they 'order' and more.
Once plans come to fruition Mark Bohringer and Mark Rose are at the helm of construction.

MARK BOHRINGER.
ESTIMATOR
Mark (Bozza) has been with Hopwood Homes for over 12 years and his prior construction experience of being a Sub-Contractor & Construction Manager has led to him now working in the office as a Building Estimator. This role entails providing specific house quotes, quantity take offs and all purchase orders for subcontractors and suppliers. Marks excellent organisational & quantity surveying skills make certain that the lego pieces to your home build are on site and on time.

MARK ROSE.
ON SITE SUPERVISOR.
Mark (Rosey) is a new addition to the 'On-Site' team and although previously working on our sites as one of the companies Sub-Contracting Carpenters, Mark has now taken on the role of Site Supervisor. Marks construction experience and knowledge of the building process ensures that the build will run on time and meet deadlines as well as each step being completed to the highest standard and the finish being of the best quality.

GREG ARTHUR.
ON SITE LABOURER.
Greg's meticulous inspections and eye for safety ensures our sites are clean, well maintained and can be accessed by our tradesman & team with ease. Without him we would have tradies falling over one another and the build site would look like more like a bomb site.

DAVID HOPWOOD.
MARKETING & SALES.
David is our Marketing guru as well as our Enquiries Agent. David has close to 10 years experience in Retail Banking and Home Finance Management industry; this allows him to have fantastic communication and customer care skills as well as an updated knowledge of current marketing and building trends. David's role is fundamental, without him we would not be able to get all the marketing material we need or be able to source the indispensable industry connections we have now.

ANGELA SMART.
ACCOUNTS MANAGER & CLIENT SERVICE OFFICER.
Angie is our resident Accounts Manager & in house Selection Specialist of 4 years. With over 10 year of hands on experience in the Accounting industry, Angela is able to produce exact figures for each stage of the build so you know what it's going to cost straight from the get-go. Angela's artistic flare, excellent customer service and insight into styling trends are crucial when it comes to choosing colours, fittings and finishes, with a vast range of choices she will be able to source and point you in the right direction stress free.

CASSANDRA COLLETT.
ADMINISTRATION.
Cassandra is the newest member to the team here at Brian Hopwood Homes. With previous experience in the Real Estate industry in Sale's Support & Administration, she is now taking those learnt skills and tackling the role of Administrator here. Cassandra will be your first point of contact when you walk through the door or call the office phone. With hands on experience and knowledge of the Real Estate industry and its processes, she will be able to compile and handle all the required paperwork to get your home up and going from start to finish.

Tell us about some of the new, exciting projects you are working on now and in the future.

The 'Elements Estate' is the company's newest most exciting project. We currently have 16 Lots in both Stages 1C & 9 of the Estate, with 3 of the 16 already sold.

The Estate is in a prime location just off Stadium Dr, Coffs Harbour so location is perfect with any buyer lucky enough to secure a house and land package within the residence will be within minutes of the Airport, University, reputable schools, the Sporting Stadium, Coffs Harbour Health Campus as well as shopping centres and let's not forget to mention the 5 beautiful beaches that a purchaser will have at their finger tips.

Each block captures elevated mountain and ocean views as well as cool sea breezes on a

Summer's day and the warm westerly sun on a Winter's morning. With such stunning aspects Brian is very excited to build & design homes that feature and showcase these million dollar views.

This Estate is absolutely perfect for everyone; families, first time home buyers, relocations, investors and retirees, with so many amenities at your fingertips what more could you ask for?

Another Estate that has Brian chomping at the bit is the William Sharp Estate. With only 2 Lots remaining out of the original 8, we are excited to start collaborating and constructing some marvellous homes with our clients in the New Year. The Estate is also in a fantastic location in one of the newer developing neighbourhoods; again any purchaser will be within minutes of shops, schools, parks and

beaches.

As always Brian is in talks with local land holders & we hope to be releasing new lots of house and land packages in 2018. We are always happy to discuss plans on any block of land whether it's ours or yours and if you are thinking that the Boambee area might just be right for you, please don't hesitate to contact us as we have a new Estate coming up in a very popular and sought after location!

What makes you stand out above you competitors?

Brian Hopwood Homes have been and always will be a local, honest, trustworthy and a quality company.

Brian meet onsite weekly with all clients

and this has a massive impact on how the build progresses as Brian can talk directly with contractors about how work is to be performed and the clients can have input if they have any new ideas that want to discuss with Brian. This allows everyone to be aware of what stage construction is up to and any additions or issues can be actioned immediately.

Some of our clients have built 2 or 3 homes with us over a period of years and other situations have seen multiple family members sign up with

Brian Hopwood Homes for their new home.

This we believe is a testament to our great reputation and the client's positive experiences when building with Hopwood Homes.

What to consider when looking & building a new house?

There are many things people should thoroughly consider when looking at building a new house; in this process every single detail is important. But everyone has different priorities and values, so what does our office think?

Many people think price is the most crucial part when considering building and often is the pivotal point when it comes to making a decision. Yes price is important but quality, honesty and trust are paramount. The price is not going to be worth it if your house is

falling down in a year's time, people need to trust their builder and know that they are going to look after them through the whole operation.

Location, location, location... You have probably heard it all before but it is in fact as import as they say it is and it's not just about which suburb or which street you build in... It's about precisely where on your land you build the home. When looking at purchasing

“

Another thing to take into consideration is *'Lifestyle Design'*. This simply refers to the design and layout of your home & will it accommodate the current lifestyle and the lifestyle you want to have.

”

indoor swimming pool during the wet season and no one wants a sauna during the hotter months. The location of your block and the placement of your home on that block will

land you need to envision the spans and layout of where ideally you would like your home to 'sit pretty' now you need to imagine Mother Nature at her worst.

No one wants an indoor swimming pool during the wet season and no one wants a sauna during the hotter months. The location of your block and the placement of your home on that block will

determine whether you are getting the most out of it and whether it is going to last the test of time.

Another thing to take into consideration is 'Lifestyle Design'. This simply refers to the design and layout of your home & will it accommodate the current lifestyle and the lifestyle you want to have. When you are looking or are in the process of building your new home, you need to think about the here and now as well as the future....

A few of the question you need to ask yourself are

- Do you prefer open plan or separate rooms?
- Would you like to be able to entertain from the kitchen but be able to see the kids in the lounge room? Or do you prefer keeping the sound of the kids and TV dulled behind a wall?
- Would you like to be able to serve coffee and platters of food flawlessly like a champ out to the undercover alfresco area via the openstack sliding doors and not have to pinky wrestle with slippery door handles?
- Will the amount of bedrooms you have in mind accommodate friends or extended family staying or are you ok with sharing a bed with

your snoring relative?

- Have you allowed enough backyard for the dog to run around in?
- What about a future pool, have you thought about that on a summer's day?
- Will the yard be too big and too much to maintain?
- Are you ok with guests walking through bedroom areas to use the bathroom or would you prefer them to have access to a tucked away wall closet?
- Does the garage have enough room for you to store your, push-bikes, surfboards and

fishing gear?

- Will you be buying furniture for your new home or shifting what you already have? And will it all fit?
- And will you still love those bright red retro subway tiles in 6 months time?

Suppliers and materials play a vital role in the quality and finishes of your home so people need to remember that just because they may

“

So when researching and *speaking to a builder about these things*

- people need to consider supply and material quality and will it last the test of time.

have seen a design on a Reality TV show does not mean it is suited or right for them and just because something is pretty does not mean it is going to do the job.

What makes up your house is just as important as

who! So when researching and speaking to a builder about these things - people need to consider supply and material quality and will it last the test of time.

How important is it to support local businesses?

We have a wonderful working relationship with all our contractors and suppliers and we are proud to be able to use local companies where we can in our business.

Supporting local businesses has a massive impact on the Coffs Coast as it means we all succeed and that benefits not only us directly but the future generation and Coffs Coast as a great place to live and work.

When everyone works professionally together the results are a smooth, problem free

build and we like to put on an end of year casual get together to show them our appreciation of their efforts that assist in making our business such a success.

Where are the Hot

Spots to build on the Coffs Coast?

There are very few quality lots of land left in Coffs Harbour, they have been either already snatch up or the land holders don't want to let go.

The 'Elements Estate' will be the Hottest spots to build if not already one of the hottest spots on the Coffs Coast with multiple lots

Brian
Hopwood
HOMES

With many new homes finished or under construction *this area is ideal for first time home buyers or new families.* Once again it is close to all the necessary conveniences without all the houses being on top of each other.

sold or under offer. It is in an ideal location close to all the amenities you could want and need without being in the hustle and bustle of the CBD. We currently have in total 16 Lots in the Estate with 3 already sold before registration... Now with Stage 1C (Moonlight Crescent) registered we have noticed a fast and growing increase of interest due to the fantastic qualities the Estate has to offer.

Another popular developing location is around the Loaders Lane, William Sharpe Dr and Pearce Dr area in the Western side of Coffs Harbour. With many new homes finished or under construction this area is ideal for first time home buyers or new families. Once again it is close to

all the necessary conveniences without all the houses being on top of each other. In mid 2017 we had 7 blocks for sale in the William Sharp Estate and 6 of them were sold just like that, with the amount of interest circulating in that area the last remaining lot is currently under subdivision to meet the needs of potential purchasers.

There is a growing demand North due to the recent Highway upgrade between Moonee Beach and Corindi, many people are choosing to relocate for the convenience of developing neighbourhoods in fantastic

suburbs such as Sapphire, Corindi and Moonee Beach. These Northern communities now have the ease of instant access to the highway which takes you straight into the Coffs harbour CBD in under 15 minutes. In the

last 12 months we have built approximately 9 beautiful homes north and at present have 4 Jobs under contract.

Finally as always is the Toormina, Boambee & Bonville area's, they may not always be the hottest spots but always rank number 1 for the most popular areas to build and live in. Located 5-10 minutes outside of Coffs Harbour these are the most affordable areas to purchase and live in, with their own access

to local supermarkets and shops as well as reputable schools and public transport there is no doubt why it is a popular location. During 2017 we constructed in total 18 homes in the area and currently have 5 under contract.

In the past 18 months the Coffs Coast has seen in influx of 'tree changers' from big cities. With the medium prices in larger cities sitting around the \$900,000.00 - \$1,000,000.00 mark for minimal space, the Banana Coast is a very attractive \$469,000.00 - \$550,000 average... No wonder the demand for new housing has increased and hot spots have been snatched up, so if you're considering building now is the time to get in & get your slice of land before they are all gone.

Brian Hopwood HOMES

How important is sustainability when building a new home?

Sustainable houses are cheaper in the long run because they are much more energy efficient, a sustainable house will have fewer and lower utility bills.

All Brian Hopwood Homes come with Solar Hot Water and a 1.6kW Solar Power System which is a great way to help our clients start to save on energy bills that seem to be always on the rise. Those clients that are able to upgrade to either 3.24kW or 5.13kW will see the benefits immediately and may avoid paying power bills all together. Although initial startup costs may be an additional expense the systems quickly pay for themselves.

Water Tanks and Insulation are also required inclusions that add to the sustainability of a

Brian Hopwood Home.

BASIX is one of the strongest sustainable planning measures to be undertaken in Australia and it aims to make all residential dwelling types in NSW energy and water efficient. BASIX applies to all new Development Applications in NSW and sets sustainability targets for water and energy as well as minimum performance levels for the thermal comfort of the proposed development thus making homes far more energy and water efficient than they were 10 years ago.

Sustainable homes cost much less to heat and cool in the winter and summer, respectively and when the home is designed to take into

“

BASIX is *one of the strongest sustainable planning measures* to be undertaken in Australia and it aims to make all residential dwelling types in NSW energy and water efficient.

account the region's weather conditions and orientation on the land is done correctly the building is able to let the sun in during cold seasons and shut it out when it's hot hence you create homes that

require minimal active heating or cooling. **Tell us about your community involvement.**

Brian Hopwood Homes has been sponsoring the Coffs Comets Junior Rugby League for over 20 years and have great pleasure in sponsoring some great organisations and events in 2016 & 2017.

• Business & Professional Women (BPW) Coffs Harbour • Social Concepts Dance Studio

• Sawtell Panthers • Mothers Milk Sawtell- Tim Rogers performance • Oz Tag Mens team Coffs Harbour- National Titles • Joe Vallance, Sam Parkes and Zane Misios -3 Local boys who have been selected to tour in 2018 with the NSW Country Team.

Other news

Forest View project at Bonville was completed which saw Brian Hopwood Homes built 10 beautiful homes all in the 1 street and to ensure our clients got to meet their new neighbours and for us to have a catch up Hopwood Homes put on a street BBQ – a great afternoon was had by all.

Our relationship with our clients do not end when the home is complete it goes into the future.

Brian Hopwood HOMES

TESTIMONIAL

When it comes to building your dream home, there's no better builder to place your trust and make your family dreams come true than Hopwood Homes.

Brian was involved in the design of our new home and the experience was stress free and seamless - nothing short of perfection from beginning till hand-over of the house. Brian and his team not only delivered on time with a quality finish but displayed the utmost care and professionalism. They provide a level of personalized service that is second to none.

The Entire Team including the Office Staff were very approach-

able, flexible and willing to adapt to change. The quality of service during the design, construction and completion of our new home was exemplary.

Brian has a very hands-on approach and due to our work commitments we were unable to meet during the week but Brian made himself available to meet on Saturdays on site. The follow-up from Hopwood Homes after completion was amazing.

Thank you so much for the spectacular job you ALL have done. You have not build a house for us but a beautiful HOME.
